

Greek Fire by Axel Vergnaud

The complete lighter magic set by Axel Vergnaud

This is a complete lighter magic set that will allow you to perform close-up miracles. You'll be ready to amaze with six extremely visual effects with a mini-Bic lighter. These professional routines are perfect for walk-around, close-up and social media.

Transpo: A yellow and black lighter exchanges place several times, even though one of them is inside the spectator's hand. Everything is completely examined at the end.

Traffic Lights: You show a black lighter with two sticker dots, one red and one green on both sides. Visually both spots fuse into one: a yellow spot. Finally, the whole lighter turns yellow.

Mario Bros: You show a lighter with a black and white Mario Bros. sticker on both sides. Suddenly Mario transforms and is full of colors on both sides. The lighter is completely examinable.

Gradual Change: A blue lighter starts to change slowly at four stages into a red lighter. Two handlings are explained; you can even give the lighter for examination at the end.

Rubik: You show a lighter with a mixed Rubik sticker on both sides. Visually the Rubik solves itself on both sides and you give the lighter for examination.

Use your own mini-Bic lighter.
