

Inside by Michel

The impossible nested prediction

The mentalist displays a completely sealed envelope, then a spectator freely names any card. The performer takes out a closed card box from inside the envelope. The spectator holds the box and opens it. Inside the case, there is a deck of cards and a prediction folded into quarters. The prediction reads, for example: "Your card will be the number 14." The spectator counts 14 cards in the deck and finds his freely named card!

- **The spectator can name ANY CARD**
- **No memory or calculations**
- **Both sides of the card box are shown**
- **The spectator takes the cards and the prediction from the box**
- **Use your own deck of cards**

You receive:
