

Constructo by Thinking Paradox

Imagine materializing in your hand a thought-of card, **even before knowing its identity!**

"**Constructo**" is a fresh approach to the thought-of-card plot that combines visual magic with astonishing mentalism. Created by the Thinking Paradox team, known for bestsellers like "Clear Choice" and "Unliftable".

Key points:

- **The card is not forced.** Spectators make free choices and can even change their minds at any moment.
- **You don't need to know the card in advance.** The card appears in your empty hand even before the spectator names it!
- **No switches or indexes.** Forget about complicated memorization.
- **No clothing restrictions.** No sleeves or clothing gimmicks are used.
- **Super easy to do.** The appearance is very clean, visual, and easy to do. Technically, it's almost as easy as opening and closing your hand.
- **Angle-proof. Works great for close-up or stage.** You can perform it for a small group completely surrounded or in front of hundreds of spectators.
- **Ready to go.** High quality pre-made gimmicks are included. They are made with super durable materials. They will last forever!
- **No preparation required.** It resets automatically at the end. Just put it in your pocket, and you'll be ready to perform it anytime.
- **Everything happens in real-time,** without assistants or preshow.

Each unit has been handcrafted in Spain with great care and supervised one-by-one.

Important: the gimmick comes in blue Bicycle playing cards.
