

Red V2 Cohorts (Luxury-pressed E7) - Pokerdeck

Blue Cohorts have become one of our best selling decks, the favorite amongst all the professional magicians we work with.

Why? The unsuspecting look, the revolutionary marking system... but most importantly the way they FEEL.

So naturally, we wanted to bring the original red Cohorts to the same level. Printed on luxury E7 stock the Red Cohorts feel as good as they perform. With a thinner, more durable deck these playing cards are unlike any other.

But one thing hasn't changed. Hidden within the lines of the intricate back design are markings undetectable to the untrained eye. Easily readable for any magician, card mechanic or mentalist out there.

Each deck comes with 52 cards, 2 Jokers, 1 alternate color double-backer and a duplicate Queen of spades (for obvious magical reasons). All fitted with the same revolutionary marking system only the Cohorts can deliver.
