

Golden Block Mystery (aka Mini Die Box)

If you like smaller well-made props, then this is for you.

We are happy to introduce our **Micro Die Box** to the market, finely crafted from wood and then finished in a deep brown.

We had this made in European style with two doors in front and back.

Display a wooden cabinet, a die and a top hat or container. Take the 'die' out of the hat, the hat is shown completely empty. Put the 'Die' in the right side of the box. Now close the doors and tilt the box slightly to the left. They hear the 'die' slide! Open the right door, the 'die' has vanished! The kids yell and scream "You just slid the box" Close the door and the 'die' comes back! The kids yell and scream again! Have some fun with the routine for as long as you want. Finally, you open ALL FOUR doors, the 'die' has vanished completely! Now reach into the top hat and produce the 'die'.

Sliding gimmick in base!

We did not finish the die as a die but left it as a "golden block" this way it vaguely matches our Squeeze Block.

Block is approx. 1 "3/8". The box measures approx. 5 x 2 "5/8" x 4
