

## TOON BALLOON by Gustavo Raley

After being presented at the Blackpool convention and being chosen as one of the 10 best effects at the convention, we present **Toon Balloon**, the new creation by Gustavo Raley.

Imagine blowing up a balloon, drawing a face on it, and having it start talking, and the best part is, at the end of your performance, you can give it away as a gift!

You can incorporate it into all your presentations, as the set includes all the necessary elements to perform this illusion. Additionally, it comes with a detailed video tutorial that explains all the necessary techniques and various routines for your shows.

With **Toon Balloon**, you can make the balloon sing songs, even perform "Happy Birthday" to honor someone special. If you practice ventriloquism, this effect can be an ideal complement to your routines. You also have the option to combine it with various magic effects involving the use of balloons. It's important to note that the balloons and their supports are completely normal and can be purchased at any party supply store.

Feel free to include this new and exciting effect in your shows. Imagine all the creative possibilities you can explore with it.
