

Mind Entanglement by Hank and Joseph Lee

One of the favorite plots in magic is matching effect. You may be familiar with the classic ESP cards matching routine, that's deceptively simple, yet packs a powerful punch.

For the past seven years, Hank has delved deeply into perfecting the Matching effect, utilizing a blend of linguistics, body language, and psychology. The result is an experience that gives the audience the illusion of unparalleled freedom and choice. Each matched pair seems more random and impossible than the last, achieving the impression that "it was their choice" and "the magician didn't even do anything."

Storm Creative is proud to introduce "**Mind Entanglement**" - a game-changer. By incorporating images of well-known landmarks, the matching routine becomes a narrative, and can be weaved seamlessly into everyday life and be more relatable for your audience.

Included with the set is a comprehensive tutorial, leaving no stone unturned. Hank imparts every detail, including how to deal with unexpected situations, sharing his insights from real-world scenarios and unforeseen twists.

Honed over thousands of live performances, Hank's experiences stand as a testament to his mastery of this effect. With his guidance, you will master this routine in no time, with half the effort.

But that's not all. In this version, Hank has taken things up a notch, adding an extra phase to the routine. Whether you're performing solo or engaging with a table of ten, this additional phase promises to deliver jaw-dropping magic that will leave your audience in awe.

Product Features:

- The cards are printed on the highest standard Casino card stock.
