

Apollo's Secret Message by Hugo Valenzuela

The magician gives a card to choose. Then, the magician assisted by a video from his cell phone, tells a story of a space trip to the moon on Apollo 15 in 1971.

A moon necklace will travel from the video to the magician's hand. After the apparition, the magician will illuminate this necklace with the flashlight.

In a surprising way and with a visual effect, the image on the necklace will reveal the moon with the chosen card. Simple, different and original are the attributes of this effect.
