

Portable DLX Wine Glass

Often magicians use a wine glass during their show. The problem is that regular wine glasses made of real glass are heavy, bulky and fragile.

This beautiful portable wine glass is the perfect solution!

It is made of PCTG material that makes it transparent and very similar to glass, but much lighter and stronger.

It can be disassembled so that it packs very small in the magician's case. It even has its own small neat carrying case to further protect it!
