

## Comedy Funnel

The magician makes milk or any other kind of liquid vanish!  
He asks a spectator to drink a glass of liquid such as milk, soda pop or water... and now the fun begins! The performer picks up the funnel and places it under the spectator's bent elbow. Now a second spectator is requested to assist in the pumping of the spectator's arm up and down. Suddenly, the liquid starts to spurt from the funnel into a glass held by the performer right under the funnel.

This is a great comical magic!

- Very easy to do.
- Suitable for any kind of performance, children love it.
- Made in aluminum, highly polished.
- The funnel is 19 cm (8") high and has a diameter of 14 cm (6").
