Death Knight (Inferno) Playing Card

is limited to 3000 decks worldwide, produced by Evokad, printed by KSPCC.

The story deepens as the knight is thrust into the Inferno, a realm of fire and fury where the heat of battle and the flames of wrath ignite his soul. The crimson skies burn with the rage of countless wars fought and lost. Here, the knight's armor glows with the embers of destruction, and his once noble heart is consumed by the fury of the infernal blaze.

In the Inferno Edition, the vibrant reds and molten tones paint a vivid picture of the knight's internal struggle. His sword, now a weapon of vengeance, reflects the fire that fuels his rage, and the shadows of those who've fallen by his hand swirl around him. This edition symbolizes his fury, power, and the unrelenting fight to survive in a world where fire reigns and mercy is lost.
