

Endless Chain Deluxe (Silver)

Rooted in the classic con known as Pricking the Garter, this age-old deception has been performed for centuries under various names like Fast and Loose, Chain of Chance, Loopy Loop, etc. - With an **Endless Chain Deluxe**, you can become part of that history and join a long line of skilled con artists and start to captivate (and con) your audience in style.

What makes this chain stand out?

This chain has a rounded, interwoven structure that looks amazing and handles beautifully. The natural flow of the complex design enhances deception by making it hard for spectators to track the layout of the chain, giving you an extra advantage. In addition, the design ensures minimal tangling - so you can stay focused on the performance.

This luxurious chain is available in two stunning finishes:

- **Gold Chain:** This is not your average "gold-look" chain. It is a stainless-steel chain coated with genuine 18K gold. Using Physical Vapor Deposition (PVD), a technique where the gold is bonded to the steel at a molecular level, creating a long-lasting, tarnish-resistant finish that makes it a true showpiece.
- **Silver Chain:** While it's not silver, you'll never have to polish it. The plasma-polished stainless steel delivers a brilliant, polished finish that withstands handling and performance while maintaining its luster.

To complement its elegance, each **Endless Chain Deluxe** comes in a high-quality, handmade velour bag-adding a touch of class and keeping your chain protected in style.

Specifications:

- **Chain Type:** Double Link Cable Chain - premium, intricate, and elegant
- **Length:** 180 cm (6 ft) - ideal for Endless Chain/Fast and Loose routines
- **Thickness:** 6.6 mm - more substantial, refined, and smooth in hand
- **Weight:** 135 g - offers superior handling and a luxurious feel
- **Material:** Stainless steel with a plasma-polished silver finish or a PVD-coated 18K Gold finish

- **Tangle Resistance:** Designed to minimize tangling; easy to untangle if needed
