

## **False Casey's - Pokerdeck - Markiertes Kartenspiel**

### **False Casey**

**is a collaboration between Casey's Playing Cards and False Anchors, blending two distinct identities into one striking, fully functional deck.**

**This isn't just another pretty pack of cards. It's a fully marked deck, built for serious performers and casual handlers alike. The faces feature subtle one-way design elements created to work seamlessly with the routines found in the Midnight Sessions book-making this deck as deceptive as it is beautiful.**

**But the real innovation lies in the back design:**

**Pantone (Spot Color) Printing is used for all the deep nautical blues, delivering rich, consistent color across every deck.**

**CMYK Offset Printing is used to capture the full vibrancy of the iconic flamingo at the center, a printing combo never before used in the world of playing cards.**

**False Casey is a modern take on a classic aesthetic, made with the precision, detail, and bold creativity that both brands are known for.**

- **Fully marked**
- **One-way faces for hidden advantage**
- **Dual printing methods Pantone + CMYK**
- **Designed for magicians, collectors, and creators**

**Grab your deck and hold a piece of card magic history.**
