

## Color Telepathy by JT Magic

Color Telepathy is a color-guessing magic effect. The routine is straightforward and clean:

- The magician displays a cloth bag containing three small sandbags red, yellow, and blue.
- The magician hands the three sandbags and the main cloth bag to the audience for inspection.
- The sandbags are placed back into the cloth bag.
- Without revealing the colors, three spectators each take one sandbag and conceal it in their pocket.
- Finally, the magician accurately reveals the color of each spectator's sandbag!

Beyond this basic effect, Color Telepathy can be used for various other routines, such as:

- Order Prediction
- Color Matching
- And much more!

**Low cost, high impact-the only limit is your imagination!**
