The Stick Up by Matthew Wright and Craig Petty

Craig Petty and Matthew Wright

 combine to bring you this incredible collection of effects utilizing a wonderfully useful kind of glue stick. Between them they give routines ideas and effects suitable for close-up, parlor and stage. Some of Matthews finest effects released over the last 15 years have been reworked and remastered to be included in the project and Craig has delved deep into his genius mind and come back with some absolute gems.

Whether you are a beginner card magician or a well-seasoned mentalist... there is something for everyone. With over 2 hours of in-depth tutorials and live performances you will come away with multiple routines that you will want to add to your set. And the beauty of this project is that the effects are so different you can add two or three and nobody would suspect you are using the same principle.

Highly recommended!
