

CanTastic 2.0 by Maurizio Visconti

Imagine this:

A spectator's signed coin vanishes into thin air, right before everyone's eyes. The magician's hands are completely empty. No obvious trick, no suspicious moves. And yet, with a theatrical gesture, a sealed and unopened can is picked up.

It's slowly opened... and submerged in the liquid inside is the signed coin!

Cantastic 2.0 is the next evolution of the classic coin-in-can effect, with a powerful twist:

- **No complicated setup**
- **The can is fully sealed and genuinely filled**
- **Easy to perform, yet visually stunning**

Perfect for close-up, street magic, or parlor shows, Cantastic 2.0 leaves audiences speechless. Whether it's a coin, a ring, or any small, signed object, the result is always the same: impossible.

Get ready to blow minds.

Cantastic 2.0 - because real magic needs no explanation.
