

Stage Manipulation Cards - Flesh-Toned back - Spezial/Gaff

A rare poker deck from the Italcards company, which operated in Bologna during the 20th century, perfect for those who practice card manipulation on stage or wish to learn this fascinating art.

The back features a solid flesh-toned color, providing a technical advantage: this shade helps conceal the cards between the fingers, making palming techniques and other stage manipulations even more effective.

The quality of the cards ensures an excellent handling, while the deck's total thickness of 1.3 cm guarantees a comfortable grip and optimal control.

A true must-have for magicians, illusionists, and cardistry enthusiasts!
