

Firefly by Titanas

Some moments in magic feel like cinema.

Within your hands, a spark of light appears. It flutters. Glows. Fades like a memory. And when it's gone... your hands are empty. Your audience is left breathless.

That's what **Firefly** delivers.

Not a novelty. Not a toy. **A precision light device built for real magicians.**

A New Kind of Utility

At its core, Firefly is a **super-bright, ultra-quiet, stealth-powered light device** that can create a light that appears, vanishes, and enhances any routine you already do.

But where others are clunky, obvious, or stuck in the 90s - **Firefly** is sleek, smooth and invisible - until it's everything and nothing.

No loud clicks. No weird handling.

Just light. On demand.

Why Firefly Is Different

- **Powerful Visibility** in dramatic low light - but it doesn't fade when the lights come up. It's pro-grade brightness gives you round-the-clock impact and cuts through ambient light commands attention. The "JJ Abrams" effect in real life.
- **Dead Silent** Ghost Touch system means you trigger it with zero sound. You'll feel it, they won't hear a thing.
- **Three Performance Modes** Control, semi-auto for drama, or full auto for those "wait for it..." moments.

- **Fade In, Fade Out** Light build, linger, and disappear slowly, like CGI in real time.
- **Compatible with Everything** Specific routine. It amplifies whatever you already perform - cards, coins, mentalism, appearances, vanishes, transpositions, or manipulations - you name it.
- **Color Customization**
The core light is blinding white, but we teach you how to modify the look to match your aesthetic or storyline.

The core light is blinding white, but we teach you how to modify the look to match your aesthetic or storyline.

Created by Titanas. Taught by Javier Fuenmayor

This isn't a one-off gimmick. It's the product of years of creative obsession from **Titanas**, a name known for redefining magic.

And when it comes to teaching, **Javier Fuenmayor** walks you through everything - from simple visual effects to cinematic, emotionally-driven routines that will never fade from memory.

You'll get over 2 hours of content:

Appearances, vanishes, and visual hits that play on stage or up close and personal. Integrate **Firefly** into your existing routines. Make old tricks new again.

Firefly is...

- Light, anytime, anywhere.
- Silent. Sleek. Daylight-ready.
- Built for storytelling, not just spectacle.
- Perfect for vanishes, reveals, or magical "glitches."
- A tool you'll actually use.

The best gimmicks don't scream "look at me" - they simply whisper... and the world changes.

FIREFLY ILLUMINATE THE WORLD, ONE SPARK AT A TIME
