Shaker by FlatBase (Red)

Never before have cards appeared inside a card box and looked so real...

Moreover, it's not just about cards now - poker chips, coins, dice, they also can appear inside a card box. and you can tell it by the sound first and then produce them from the "empty" card box.

Not only you, but even spectators can check the sound and feel by themselves that something has appeared inside the card box.

But not only sound control, you can use it without sound as a perfect card inside a card box device, in a more classic way, with a lot of your favorite routines.

So, Flat Base proudly presents to you **Shaker - an innovative, precisely** handcrafted device for maximum realistic appearances - from nothing to something.

We are so confident in our product that we have decided to place a QR link for you in the trailer so you can understand how **Shaker** works even before you buy it!

And inside you will get more in-depth tutorials with a lot of different routines and ideas.
