

BIGBLINDMEDIA Presents Alpha to Omega (ESP Edition)

Stephen Tucker

One of the most mind blowing and incredible packet tricks ever invented is reborn with **custom ESP Cards!**

Stephen Tucker's **Alpha to Omega** is widely held to be one of the greatest packet tricks in magic.

"The most baffling and incredible packet trick I've seen in years!"

- Jerry Sadowitz

This ingenious handling for B'Wave has been a best seller in magic for two decades.

Now this monster routine has been reimagined with custom printed ESP Cards.

Using just the provided cards, you can unleash FIVE phases of magic.

You show two packets of examinable ESP Cards.

They name ANY (yes, ANY) symbol and in a flash, you impossibly reverse it in one of the packets.

Then you show that this card was ALREADY reversed in the other packet.

And you're just getting warmed up, as there are FOUR more incredible reveals coming...

- Easy to do
- Examinable
- No forcing- different results each time
- No rough and smooth or sticky stuff
- Instant reset

Or, to put it another way... this just might be THE STRONGEST PACKET TRICK YOU CAN DO!
