

Joker Orchestra by Yoan Tanuji & Magic Dream

Are you looking for a packet trick that combines storytelling with mentalism and no manipulation? Look no further than **Joker Orchestra!**

Crafted by the renowned French magician Yoan TANUJI, a master of magic and mental effects for the working magician, this trick encapsulates his philosophy on mentalism - simple, direct, and effective with a touch of comedy! He created this new effect by considering the word "REVEAL" above the words "GUESS" or "PREDICT".

Perfectly designed, your Jokers, typically sidelined, take center stage as musicians in a showdown for an imaginary TV performance like "GOT TALENT". As you eliminate the musicians in various entertaining ways, your audience will be on the edge of their seats. Ultimately, only one joker will emerge as the champion of this orchestra. But you'll be the real star, basking in the applause of your spectators!

This set includes **10 beautifully designed cards** and access to a **45-minute instructional video** featuring five unique elimination forces. Yoan's insights on presentation, convincers, and staging are invaluable, ensuring you deliver a memorable experience every time.

Transform your close-up performances with **Joker Orchestra**, a delightful blend of mentalism and storytelling that your audience won't soon forget!
