

## Out of This Oz by Jonathan Sadowski

This is yet another STRONG close up routine by Jonathan Sadowski. (He created PREDICTO and RED AND BLUE)

If you are a magician, you'll recognize this as a version of Out of This World BUT there is MORE to it!

You show bunch of black brick road cards and yellow brick road cards. The spectator decides which cards go in the black pile and which go in the yellow pile. Of course, in the end, everything is where it should be. BUT.... there is no packet switch halfway through! You deal all cards into 2 piles and the spectators REALLY DECIDE where each card goes!

- No rough and smooth
- No short cards
- No sleights!

### YOU ALSO GET:

- No Place Like Home BONUS

You show a stack of pictures of a Yellow Brick Road and pictures of a Scary Black Road. The cards are REALLY shuffled, and the spectator rolls 2 Red Dice (included) and they can roll it AS MANY TIMES as they want! These are REAL DICE! Whatever number they decide on, they point to that many cards. For example, 8, the REALLY point and ANY 8 cards and then decide if they all go on the BLACK BRICK road or the YELLOW BRICK road! Let's say they put them all in the yellow pile. For real! No force! The rest of the cards that were not pointed to, are put in the black pile. Everything, so far, can't get any more fair!!

You then turn around all the cards in the Yellow Brick Road and they ARE ALL YELLOW! And all the cards in the Black Brick Road are turned over and are ALL BLACK!!

**Out of this Oz** comes with all the cards needed, nothing to make or build. We also give you 2 red dice to represent the Ruby Slippers and Video Instructions.
