

Invisible Deck Crib by Charlie Roper

The **Invisible Deck Crib** hides in plain sight on the back of your Invisible Deck card box and contains the information needed to help you locate the spectator's chosen card with confidence.

This utility helps magicians learn this classic trick faster, and also serves as a backup tool in the event a mental block occurs during your performance.

This utility eliminates memory and math, and allows you to focus on the performance presentation; instead of worrying about the method or missing the spectator's chosen card.

The **Invisible Deck Crib** is the perfect utility to use with your Invisible Deck!
