

Grips, Lines and Looks by Marc Oberon - Buch

Grips, Lines and Looks

is the definitive work from FISM award winner Marc Oberon, finally revealing his complete system for choreographing and structuring performances. Watch them be elevated from simple tricks to powerful moments of real magic.

If you have ever wondered how to increase the impact of your existing repertoire of material, this beautifully presented 128-page hardback book and DVD contains the answer. This is the system that Marc has used to create professional routines that have won him awards at *FISM*, *European Close-up Magic Championships*, the *IBM British Ring competition* and the *Macmillan International*, amongst others, as well as entertaining audiences at high-profile gigs across the globe. *Grips, Lines and Looks* details the exact approach Marc uses, and it explains how you can apply the same system to every one of your own performances.

"Reading your thought process gave me an amazing insight into why you did so well at FISM... The magic world is really lucky that you are sharing your thought process."

- Richard Young

"Marc Oberon has managed to create a very 'practical theory' with *Grips, Lines and Looks*. It is an approach to performing that all magicians should review and consider in an effort to raise the level of their performance."

- Pete Wardell

"I think you have some brilliant thinking here and, if nothing else, will invite the reader to question whether their own magic is as strong as it could be. Very thought provoking - on track to be a very useful work for any serious performer."

- Nicholas Einhorn

"I've always admired Marc Oberon's artistry. Of course, his magic is always of the highest quality, but there is something else -- those intangible qualities that mark out a true performer from someone who does some great tricks. If you are serious about **PERFORMING** and want your

performance to become closer to art, then this is the book for you."

- Marc Paul

"With study and practice, it's IMPOSSIBLE not to improve your magical performances if you purchase this item."

- Dee Christopher

"Marc Oberon is on top of his game. His new book deconstructs what makes his magic so magical."

- Andi Gladwin

"Beautiful quality from cover to cover. Smart practical routines with mind-expanding theories."

- Jeff McBride

Note: This is the paperback version of Grips, Lines and Looks
