

## Flowers for Vanishing Cane

Here is a very useful accessory for magicians who perform stage or parlor magic. If you are tired of the usual two silks to make appear from your "vanishing cane", here is a different alternative, colorful and at a price accessible to any budget. The magician enters the scene with an elegant evening cane, grabs it by the ends and magically transforms it into a colorful bouquet of flowers.

- The bouquet of flowers, made of feathers, is about 65 cm high.
- Easy to make and always has an impact on the audience.
- We recommend using these flowers with a vanishing steel cane.
