

Expanded Shell Coin - Half Dollar (with metal shim)

The expanded shell is a very usefull coin gimmick. There are many effects possible with it. It's use makes many coin routines much easier.

- Made carefully.
- This shell can also be attacted by magnets which makes it a leathel weapon in the right hands!
- In the instructions you will find a nice routine, in which a half dollar visually penetrates a borrowed bill (for this a regular half Dollar will be needed. It can be purchased separately).

NOTE: The coin is a replica of the half dollar for entertainment use.
