

## **GOLF! by Martin Lewis**

You are buying the props, instructions, and performance rights (no restrictions) to my signature **GOLF** routine.

**GOLF** has been a mainstay of my show for over forty years and, in that time, I've honed it to perfection. The golf theme sets it apart from other egg bag routines, and the final production of a golf club adds a surprising climax that always bring enthusiastic applause.

The routine is practical, takes up very little space in my case, and is bulletproof. The box contains a gaffed plaid bag, a production golf club, a special ball, and a zipper bag to transport the club. There is also a link to downloadable instructions that include live performances.

This version includes a smaller, 3D-printed golf club instead of a wooden one, that is easier to palm and produce.

It is kept in its original grey color, but it can be spray-painted in any color of your choice.

Martin preferred wooden golf balls, which are lighter than standard ones, this comes with regular lightweight training balls instead.

**THIS VERSION COMES WITH AN REGULAR SIZED EGG BAG!**
