

## Golden Key

Show a vintage golden key. With your finger mysteriously rotate the teeth. Then move it towards the handle of the key. The audience will clearly see the teeth slide down along the key from the tip to the handle. It all happens very slowly and without any cover. At the end, the teeth will be permanently welded to the base of the key and you will be able to hand it out for examination.

- Can be immediately repeated.
- Classic magic, pocket size and always ready for use.
- At the end of the routine the key can be given out for examination.
- Does not require a table. Suitable for any kind of audience.
