

CORING by Menzi Magic & Zhao Xinyi (Size 12)

CORING

is a brand-new ring gimmick. It makes ring magic simpler and more visual.

It achieves not only cinematic coin-to-ring, aluminum foil-to-ring transformations like video editing effects, but also delivers very visual ring vanishes, appearances, transpositions and more.

The tutorial video content covers three types of applications:

- The effect of using a prop ring alone.
- The effect of a prop ring with an ordinary ring.
- The effect of a prop ring with an iron coin.

What do you get?

- A specially designed prop ring
- An ordinary ring
- An iron Morgan dollar
- An accessory
- A link to an online tutorial video.

The sizes listed are US ring sizes. When selecting your ring size, choose one size larger than your daily wear ring. The ring must not fit too tightly.
