

## Acrobatic Blocks

The magician displays a square tube which is completely empty. He also introduces three big dice coloured BLUE, RED & WHITE that just fit in the tube. After demonstrating the dice, pass freely through the tube, he drops them into the tube following the order of BLUE, RED & WHITE. Then he lifts the tube. Presto! The dice have rearranged themselves into the order of WHITE, BLUE, and RED. The same action is repeated a couple of times. Finally the dice are again displayed on all six sides & the tube shown empty once again.

A classic reimagined with a “dice twist”!

- Carefully crafted in Plexiglass. The tube measures 5.5 cm (2,16") per side and stands 21.7 cm (8,54") tall.
