

## The Cyber Pad by Maibro

As an essential magic tool for many magicians, close-up pad has been developed in many different types, including Professional Pad, Smoke Pad, Black Art Pad and so on. Today, we create a new close-up pad with innovative functions, it is also the first close-up pad that can produce light. We call it - **The Cyber Pad**.

### Functions

The surface of the cyber pad is decorated with some patterns of honeycomb elements and there are 50 custom lighting modules put into the pad fixed by 3D printing technology. When you sweep the surface of the pad with your hand, these patterns will produce brilliant blue light, like the tail flame of the rocket. It is suitable for a variety of routines, you can use it for most moves like ribbon spread, card produce, color change, coin matrix and make your performance more magical. You can also ask the audience to pick up the cards on the pad, so that they can have a good experience, too.

### Features

**The flannelette of the Cyber Pad is made of high-quality custom flannelette:**

- Outstanding hand feeling
- Non-slip back
- Easy to clean
- Brilliant colors will not run or fade

There will be quiet and silent after you turn the pad on.

The frame of the cyber pad is made of high-quality wood, and because of the special production process, it will not bend or deform after a long time.

### Dimensions

- **Overall:** 44cm x 30cm x 4cm
- **Flannelette:** 42cm x 28cm
- **Weight:** 1.5 kg
