

Phantom 2.0 (Houdini) by Rezi, Hide & Sergey Koller

The revolutionary **Phantom** portrait is back - and better than ever! Packed with groundbreaking improvements and brand-new routines that will take your performances to new heights!

What's New in Phantom 2.0?

- **Real Card Change Under the Glass:** The selected card truly changes right beneath the glass - no palming anymore

New Mind-Blowing Routines:

- Pull the spectator's card out of the glass and hand it to them for a jaw-dropping finale.
- Imagine the portrait "refusing" to cooperate - it even shows the middle finger! Then, when a spectator throws a card at the glass, it magically sticks to the finger inside of the glass.
- **Sleek and Smooth Mechanism:** The lever system is now ultra-simple and super easy to control, making your performance flawless every time.
- **Refined Details:** Every component improved for durability and seamless operation.

Everything You Loved, Now Even Better
