

Token of Fame by José Cambra

A souvenir coin from the famous Madame Tussauds Museum is shown and examined by the spectator.

The coin is then placed in the spectator's hand or in a visible place. The magician shows a list with lots of famous people you can find at the museum. The spectator chooses one of them and the coin they are holding now has that person's face engraved on it!

- Super easy to do
- Very practical
- 100% examinable
- Start clean, end clean

In the spectator's minds:

- The coin is not a magic prop, what makes this trick organic and natural.
- Their selection is 100% free.
- The magician never touches the coin.
- It's an impossible moment, they will never forget!

Included:

- 3 special coins built for this product*
- Protective cases for the coins
- Instructions with various routines

*You can reveal "Michael Jackson" and "Albert Einstein"

Disclaimer: You will receive gold color coins, but they will turn silver. If you want them to keep the gold style, you can perform with the included protective case.
