

## Aqua Black Invisible by MPC - Pokerdeck

Limited edition invisible black themed playing cards with clear raised ink print.  
100% water resistant including the box.

### THE AQUA BLACK

Have you seen anything like this before? Sleek, waterproof, invisible! The **AQUA BLACK** deck is the all-new concept deck from MPC and the second deck to follow on from our previous hugely successful AQUA invisible deck of transparent cards.

### TECHNOLOGY

The **AQUA BLACK playing cards** really is the coolest deck of cards which is transparent, waterproof and pretty much amazing. It is the latest addition to our popular Impressions playing card series by MPC, a branded playing cards and card games manufacturer with over 40 years history.

The **AQUA BLACK** deck is made using a very smart arrangement of state of the art printing and production machinery which together, can produce amazing results. We use premium transparent plastic card stock which we then apply high-gloss transparent print with pinpoint accuracy, to certain areas of the playing cards to produce a sleek raised gloss embossed effect. The cards are then completed with a finishing that enables the cards to glide seamlessly for fans and springs and perform as you'd expect a high-quality deck of playing cards to perform. Cutting the cards is no problem either as we use our MPC state of the art cutter to ensure the edges are angled for cutting into. The thickness of the deck is pretty much like a standard deck of cards.

The finishing used on this deck is unique. Most plastic playing cards cannot perform like a normal deck of paper cards in that they stick together in clumps. Not the **Aqua Black** deck as it was designed for performing with so you can make beautiful card fans easily.

### THE TUCK BOX

We designed the deck of cards to be completely transparent so what's better than a matching black transparent plastic tuck box? The result is stunning. There

are no other words for it.

## **WHAT CAN YOU DO WITH AQUA BLACK**

The **Aqua Black** deck is a very versatile deck of cards which was preceded by the hugely successful AQUA deck a few years back. Aesthetically, it is absolutely stunning and mesmerizing so it's first off, a collector's deck and it's going to amaze anyone who sets their eyes on them. It can definitely be played with. Play any card games with the Aqua deck like you would do with any other deck of playing cards albeit with a fun see-through twist to it.

### **EASY FANNING**

The **Aqua Black** deck was designed and specially developed to be used for shuffling, springing, faroing, fanning, cutting etc. so they can be used seamlessly for performing with such as magic tricks in close up card magic. Transparent cards are used quite often now to bring a new dimension into card magic. Now with the **Aqua Black** deck, you can design more card tricks to wow your friends, family or audience.

### **BEND IT**

Yes, the **Aqua Black** deck is made from premium quality transparent plastic card material with flexible high gloss printing so it can be bent without any issues whatsoever.

### **COMPLETELY WATERPROOF**

Yes, since this deck of cards is made from plastic, even the box, you can dump the complete deck into a tank of water, drop it in the toilet, throw a drink at it, throw the entire deck into a swimming pool or a pond, and it will still be fine.

### **Limited to 5000 decks**

This is a limited edition specialty deck with a production run of 5000 copies only. So, if you want one, now is the time.

**Did you get our original AQUA and AQUA PURE deck?**

## The AQUA deck

Our original AQUA deck was previously released on Kickstarter too. **It's the closest thing to an invisible deck of cards** made from transparent plastic cards. If you missed out on that, you can grab your invisible deck here today as an add-on.

## The AQUA Pure deck

Our **AQUA PURE** deck is the **100% purest deck of plastic playing cards** using premium plastic card stock with clear raised ink print. 100% water resistant including the box.

## Risks and challenges

There are no real risks with this project. We have been printing and producing cards for over 40 years. Our complex logistics network is very efficient that we use for sales on our website . We will use the same network to fulfill your rewards.
