

Zigzag Tricks by Andrew and Ednei Ernesto

Another visual miracle by Andrew! Ad copy just doesn't do it the justice it deserves - you must WATCH the video performance!

A card is selected and signed. The back is drawn on to show 3 blocks. The middle block now moves and now the card resembles a Zig Zag Box. Next, a hole appears on the bottom of the card but quickly moves to the middle and then ends on the top of the card for the finale. The hole now vanishing and the card goes back to normal and is now handed back out to the spectators.

Like every Andrew effect we have carried in the past, Zig-Zag + Mystery Hole Card is constructed by a master. When you see the gimmick in action you will be amazed! His creative process is unmatched, enabling him to push the boundaries of what a card gaff can be. Through his groundbreaking work, Andrew has left an indelible mark on the card industry, transforming everyday cards into objects of wonder.
