

Frozen in Time (Red) by Henry Evans

An excellent opener for card magic, scene, walk around, street and all kinds of magic. Easy to make and very visual.

Automatic reset. Once the effect is over, the cards can be examined.

No antennas, no reel, no elastics: a completely new method.

Effect:

The magician shows a normal deck, hands half of it to the spectator, and asks them to imitate the magician's movements, as if spreading the cards in the air.

The spectator's cards fall while the magician's float in an extension that he holds in one hand.

The magician exchanges the cards with the spectator and repeats the same action.

Finally, the magician closes the extension and shows the deck to the audience immediately after.
