

IARVEL Pad Pro (size A5) by IARVEL MAGIC

Design

:

At first glance, the most noticeable difference between the Classic and Pro models is the new sleek plastic finish of the Pad Pro. This design choice helps camouflage the pad as a regular clipboard, eliminating unwanted suspicion from spectators.

The Pad Pro Max offers additional aesthetic flexibility with both plastic and wooden finish options. The wooden version is slightly thicker to accommodate enhanced internal reinforcement, ensuring stability and strength.

- **WIDER SURFACE AREA**

Both the Pad Pro and Pad Pro Max feature significantly larger writing areas compared to the Classic version, extending to the edges of the board. This expansion allows magicians to write freely without being restricted to specific areas, enhancing the fluidity of performances. As the name suggests, the Pro Max is the largest of the two, providing ample writing space ideal for stage performances.

- **STRENGTH AND DURABILITY**

Despite their wider surface areas and slimmer profiles, the Pro and Pro Max models are built to withstand the demands of frequent use. The interiors are reinforced with strong metals, ensuring exceptional durability and resistance to bending or breaking. This robust construction maintains the device's integrity even if it accidentally slips or strikes the ground.

- **ENHANCED SPEED**

The flatter, more streamlined design of the Pro models allows for the integration of advanced processors. These powerful chips capture impressions faster and handle complex processes with greater accuracy, ensuring smooth and efficient performance during your routines.

- **IMPROVED BATTERY LIFE**

The larger sizes of the Pro and Pro Max models provide ample space for bigger, longer-lasting batteries.

The Pad Pro boasts nearly twice the battery capacity of its predecessor, offering up to 48% more battery life. The Pad Pro Max takes it further with three times the battery capacity, delivering the longest and most reliable battery life of the two, with up to 42% more than the Pro model.

Additionally, the Pad Pro and Pro Max are compatible with certain smartwatches and peek devices, allowing you to view your impressions on a smaller, more portable screen when using your phone isn't convenient. This versatile connectivity ensures that no matter the situation, your performances remain smooth and uninterrupted.
