Inversion Board by Pitata - Bühnentrick

Instead of capturing the information that the audience volunteer writes down, what if the pad could 'predict' any information we wanted, seemingly written beforehand?
You hand an audience volunteer a completely ordinary-looking chalkboard, and it instantly reveals a perfect prediction of their thoughts. This unassuming idea from three years ago, combined with the concept behind the PITATA Hotel Prediction, became the starting point for a new journey at PITATA, as we envisioned this concept evolving into one of the most powerful prediction tools available. Today, we are thrilled to present the culmination of that journey: PITATA Inversion Board.

The high-resolution display mimics real chalk drawings with pixel-perfect precision. A fast refresh module and long-range Bluetooth chip for seamless control and instant updates. The PITATA Inversion Board also has a real chalkboard on the back and a solid wood frame, making it indistinguishable from a standard chalkboard—even up close.

Product Features:
- Ultra-Realistic Handwritten Predictions: Months of pixel-level handwriting calibration ensure the board perfectly replicates the look and texture of real chalk.
- PITATA's Exclusive Handwritten Chalk Font.
- Customizable fonts: Replicate your own handwriting for a personal touch.
- No Powering Off Required: With over six months of standby time, it's always ready for performance.
- Seamless & Discreet App Integration: Control the board effortlessly via an intuitive app.
- Long Standby time: Over six months of standby time.
- Both iOS & Android compatible.
- PITATA IoT Integration: Works seamlessly with PITATA's smart ecosystem for expanded functionality.
- Multiple Preset Effects: Includes PITATA's classic Clock and Magic Square predictions, ready to use straight out of the box.

What You can perform:
- Flawless Open Predictions: Display any text, drawings, or symbols instantly.
- Any Drawings or Text: Anything drawn or written on your phone appears on the board.

- Playing Card Prediction: Predict or reveal any Playing card.
- PITATA's Original Clock Image Prediction: Predict a time chosen by the spectator, displayed as a hand-drawn clock.
- PITATA's Magic Square Prediction: Instantly generate a magic square based on a two-digit number chosen by the spectator.
- PITATA IoT Integration: Works seamlessly with PITATA's smart ecosystem for expanded functionality.
- Endless Possibilities. We update the software every month, and we're always open to your ideas & suggestions. If you have, do let us know.

Product Dimensions
- Size: 255mm × 182mm × 13mm.

What's Included:
- 1× PITATA Inversion Board.
- 1× Charging Cable & Charging Pad.
