

## Blocks by Solune Prod

If you like Retro things, if you are nostalgic of a past time ,you are at the right place.

Imagine you ask to the spectator to choose a Card.

Then you take out a Card from your wallet, this Card is a design of an arcade screen with on it the famous game with coloured Blocks falling.

You show it to the spectator and you shake your hand and visually all the squares will draw the value of the spectator's Card!

This is really magical and Retro!

This trick is:

- Easy to do.
- Very visual.
- The reset is really fast.
- Ready to use.

It is everyday carry, put it in your wallet and so, you'll be ready to perform!
