

Tempo-Lab Purple - Pokerdeck

TEMPO is born out of innovation, aiming to present to the world a unique cardistry concept through the creation of high-quality, creative products, and to explore the endless possibilities of cardistry.

The Tempo-Lab Purple adopts a flip-top card box structure inspired by the flip-top cases of sports cars. With a gentle pull of the bottom of the card box, the flat top cover is lifted upwards by the hidden "Z" shaped double linkage, rotating and popping up to 90 degrees. The entire process feels as if triggered by a motor, exuding a strong sense of technology. Tempo LAB embodies a strong sense of technology, with the X-frame design dominating the visual aspect of the cards. The purple and green color scheme, along with striped contrasting designs, offers an excellent visual experience in cardistry.
