

Dribble Catch Aces by Jackie Zhao and JT Magic (Red)

Dribble Catch Aces

is a tightly constructed, visually clean, highly flexible and astonishingly fair Ace revelation routine created by Jackie Zhao. Built on the appearance of genuine randomness, it allows precise hits during seemingly uncontrolled dribbles - culminating in a powerful and unexpected final twist. It is such a practical routine, you can find four Aces in a way that feels both impossible and organic.

Effect Description: ?You begin by removing two Jokers and placing a Joker aside. The other Joker is dribbled into the deck at any position - and it finds the first Ace. You repeat the process for the second Ace. Then things take an unexpected turn: the third time, the Jokers fail... only to visually and impossibly transform into the remaining two Aces. A strong kicker ending that surprises even the most attentive spectators.

Key Features:

- No crimps, short cards, or markings of any kind.
- The dribbling action can be performed by the spectator, with 100% accuracy.
- Only one extremely simple move is used - minimal technical demand.
- Clear structure and tight pacing create strong visual logic and dramatic tension.
- Includes bonus ideas on how to transition into or out of this routine, making it a perfect opener or a powerful part of a longer set.

Jackie Zhao's thoughtful construction prioritizes both freedom of handling and clarity of effect, making this a reliable tool for real-world performance.
