

## Fully Automatic Card Trick by Caleb Wiles

### Fully Automatic Card Trick (FACT)

is a card trick with a difference. That's because it's not the magician who does the trick. It's the spectator. You turn your participant into the star of the show. They cut, they shuffle, they do everything. Yet somehow, they not only find their own card, but they create an impossible finale.

*"That is such a beautiful trick."*

-Penn Jillette

Your helper is handed a deck filled with simple instruction cards. They freely select a card, lose it back in the deck, then shuffle and cut to mix it thoroughly. After shuffling and dealing out some cards, they come across an instruction card. They do as it says until they find another, and another, and more. Somehow, they manage to impossibly locate their own selection- despite the process seeming completely fair. And as if that weren't enough, the final kicker is revealed: along with their chosen card, they've also uncovered its three perfect mates.

*"When I first saw Caleb perform the "Fully Automatic Card Trick" on Fool Us I was smiling, ear to ear, because it had all the hallmarks of a great piece of magic: engaging presentation, completely deceptive, and unlike anything I've seen before. I'm a big fan of Caleb and this trick!"?*

-Joshua Jay

FACT is a complete package. It's a professional caliber routine that has been fully tested by Caleb over the last ten years. It combines multiple layered methods with a devilishly clever deck to create a routine that will fool and entertain your audience.

Lots of tricks claim to be self-working. FACT is self-working too. But it's more than that... the participant does everything. All they have to do is follow the instructions. And those instructions are written on the cards!

FACT is a surefire crowd pleaser and will amaze any audience. The reset takes less than a minute, and you receive everything to need to start performing this miracle out of the box.
