

## Incredible Change - Wow

A spectator chooses a card from a deck and signs his name on the face. The card is put back into the deck and everything is shuffled. Then the performer takes a card, which turns out to be any card, and puts it in a transparent case. The spectator can clearly see the face of the card. However, when the magician slowly shakes the case, the card visually transforms into the chosen and signed one. Finally, it is removed from the case and given to the spectator.

An incredibly magical and impactful morphing.

- The gimmick is of good quality.
- A pocket miracle that you will always carry with you.
- Very simple effect, ideal for surprising every spectator.
- The poker-sized deck of cards is not included.

The video and photos show the effect, but the "Wow" you will receive may be with a different card (based on our stock availability).
