

P&L Copper 6 Shot Lota by P&L Magic

A really great magic effect! Made to last. Guaranteed wonder and laughter when presented in a comedic manner.

This is a nifty junior-sized version, which measures approximately the size of your fist (its small size makes the effect even more mystifying!). You pour a drink from the **Copper 6 Shot Lota**, leaving it apparently empty. A few minutes later, you are able to pour yet another drink from the previously empty container. This continues until a total of six shots have been poured from the tiny little Lota container! Can be used in both adult and children's shows. **Copper 6 Shot Lota**, a quality P&L product.
