

The Comedy Shaker by TCC & Chen Hui

If you need a prop to set the atmosphere at your magic show, creating a relaxed and joyful environment, the **Comedy Shaker** is the perfect choice.

The **Comedy Shaker** adjusts the atmosphere of a magic performance. It can be introduced to the audience just before a critical moment as "magic powder." Sprinkling it where the magic is about to happen serves as a humorous magic gesture, eliciting laughter from the audience. At the effect's conclusion, it can be transformed into a real saltshaker, astonishing everyone. While not the main act, it adds a vibrant touch to the performance.

In addition, by taking the saltshaker, sprinkling it around, and making some peculiar sounds, the audience will laugh, naturally lightening the mood, and creating an offbeat.

Moreover, the slightly recessed base of the prop enables smoother execution of the Albert Goshman-style coin misdirection routine, expanding the possibilities for your magic performance.

Crafted from robust food-grade soda-lime glass, this product features a shell that houses a lightweight EPE pearl cotton hollow tube, effectively reducing weight. The inner lining is coated with durable white aquascape quartz sand that never fades, enhancing the realism of particles. The sound device utilizes transparent PC material for a clear bottleneck, and stainless-steel internal components ensure long-term durability.

Features

- Creates a humorous atmosphere.
- Lightweight and easy to carry.
- Simple to start and easy to operate.
- No setup needed, can be paired with various effects to enhance your magic.
- Ideal for creating a timing for a "dirty move."
- Suitable for performing Albert Goshman-style coin misdirection routines.
