

How to Read Minds: Kids Kit

They'll be the coolest kid at school.

Each kit contains:

- Over 20 tricks taught.
- High-quality, kid-friendly video tutorials.
- 7 Magic Props that look totally normal - but can help them read minds!

Real Magic. Real Reactions. No Plastic Wands.

We didn't water this down. We asked world-class magicians, "What tricks do YOU perform that kids could do too?" Then we created custom versions with props that look like normal school supplies. From predicting to reading thoughts, your child will have everything they need to blow minds at school, family gatherings, or anywhere else.

Magic That Grows Confidence

This kit doesn't just fool people—it builds confidence. Learning even one trick gets kids off their screens and into a world where they are the star. These aren't kids tricks. These are real, mind-blowing effects that fool adults too. And yes, they're easy. If your kid can watch a video, they can learn these tricks. We guarantee it.

Over 20 Impossible Mind-Reading Tricks. One Kit. Endless Reactions.

Inside the box, your child will discover magic tools that look like everyday school supplies—pens, notebooks, calculators, and more—all hiding mind-blowing secrets. These props fit seamlessly into their world, making their magic even more convincing.

Your Kid Can Read Minds (No Superpowers Needed)

No rabbits. No top hats. No cheap plastic tricks.

This is real magic. The kind that makes jaws drop, eyes pop, and friends scream, "HOW DID YOU DO THAT?!"

Designed by professional magicians and custom-built for kids, the How to Read Minds Kit is packed with mind-blowing tricks that are easy to learn and impossible to forget.

INSIDE THE BOX:

- The Jungle Book Trick: A normal-looking book with an impossible secret. Your kid can ask a friend to pick ANY word on ANY page—and they'll know exactly what it is. Mind. Blown.
- Emoji Prediction Game: Tear up emoji cards, mix them, toss them in the air, and still predict which one they'll pick. It's basically magic on autopilot.
- Marked Deck (Kid-Sized): A custom deck built for smaller hands, but with BIG secrets. Professional-level magic that adults can't figure out.
- Switch Pencil Case: Looks like a regular pencil case—but secretly swaps out paper in plain sight. Friends write down superheroes, animals, or secret words, and your kid will always know the answer.
- Everyday Objects with Hidden Powers: A notepad, a pen, a calculator—stuff that belongs in a school bag—all rigged for mind-reading miracles.

WHY THIS KIT ROCKS:

- Real Magic, Not Baby Tricks: These are pro-level tricks made easy. The same principles fooling adults at magic shows are now in your kid's hands.
- Self-Working Wonders: No complicated moves. No hours of practice. Just mind-blowing magic that works right out of the box.
- Screen-Free Fun: Tired of watching your kid scroll for hours? This kit gets them off their devices and into something creative, confidence-boosting, and fun.
- Instant Confidence: Watch your kid transform into the coolest kid in school. Magic builds social skills, confidence, and the art of performance.
