

The Oddest Coin by David Penn & TCC Magic

Last year, we partnered with David Penn to bring you **The Oddest Ball**, a hilarious piece of comedy mentalism. Now, David returns with a brand-new version-The Oddest Coin-perfectly designed for close-up performances to spread the laughs even further!

In this comedy mentalism piece, your spectator removes one coin at a time while your back is turned. Each time, they must say:

"It's the silver coin."

If they're telling the truth, you'll know instantly.

But here's where the fun begins:

When they try to lie-by removing the copper coin and still saying it's silver-you know they're lying.

Why? Not from analyzing their voice...

But because the alarm goes off and the whole stand vibrates!

It's comedy light relief during your mentalism routine. It will bring the house down.

The Oddest Ball has the same sense of mystery and surprises as **The Oddest Ball**, along with exquisite craftsmanship.

We selected the finest North American walnut to craft its shell, as its high-end, antique texture enhances the suspense of the effect. The internal circuit is 100% stable and reliable, making it incredibly easy to maintain.

The set includes five half dollar size coins, but of course, you can also use regular coins of a similar size that are more suited to your country.

What's Included:

- 1 Walnut Base Box
- 4 TCC Artisan Silver Coins (Half-Dollar Size)

- 1 TCC Artisan Copper Coin (Half-Dollar Size)
- 1 USB Charging Cable
- Additional Accessories

You're going to have so much fun with **The Oddest Coin**.
