

Ink-Redible Revelation Tattoos (Diamonds) by Twisted Minds

Any magician with a genuine card tattoo will understand the power this simple reveal has on spectators.

I have been using a card reveal Tattoo in my performances for the last 15 years and it never fails to gain huge reactions. A simple yet super effective revelation that seems totally impossible from a lay persons perspective.

What makes **Ink Redible Revelation Tattoos** exceptional?

These innovative tattoos are crafted using a ground-breaking chemical technology that allows them to sit within the first layer of skin. This creates a hyper-realistic tattoo effect that's almost indistinguishable from the real thing. No more shiny cheap looking temporary Tattoos that look like a transfer. Use one on your Arm or Wrist to show your spectators freely selected (forced) card is Tattooed on you for an incredibly powerful moment of magic, or flaunt all four in different locations ready to use as a super cool multiple out system.

Key Features:

- Natural & Organic: Our tattoos use a special organic Fruit extract that penetrates the skin surface and reacts with your natural body oils, ensuring they won't scrub away.
- Long-Lasting: Enjoy your tattoos for 7- 14 days, fading naturally as your skin regenerates.
- The ink really is embedded in to the first layer of skin creating the ultimate illusion of a real Tattoo. (No exaggeration...These are hyper realistic)
