

Super Cards Across (Red) by JT Magic

A Modern, Practical Approach to a Timeless Classic

Effect

Two spectators each receive a packet of 10 cards. One freely remembers a card from their packet.

Without any suspicious moves, the magician causes three cards to travel from the second spectator's packet into the first.

In the end:

- The second spectator is left with only 7 cards.
- The first spectator now holds 13 cards-including the very card the second spectator merely thought of.

Simple. Direct. Powerful.
