

GHOST DECK by Murphy's Magic

Get ready to experience the impossible with **GHOST DECK!**

You begin by showing off a deck of cards, each with a completely unique back design-no two backs are the same!

You casually select two cards for yourself, then hand the rest of the deck to a spectator.

The spectator now takes control, freely dealing as many cards as they want, face down, and stopping whenever they choose.

You place your first card face up into the deck to mark EXACTLY where the spectator stopped.

Again, the spectator continues dealing the cards, stopping wherever they wish, a second time.

You then place your second card, face up, into the deck to mark the EXACT spot where they stopped a second time.

Now, for the jaw-dropping part:

Despite the spectator being in full control and stopping whenever they want, your two cards have the exact same back design as the two cards they stopped at while dealing!

Coincidence? **I think NOT!**

But it doesn't end there-when you turn all four cards face up, the faces of all the cards match perfectly too! **How is this even possible?!**

And now for the final, mind-blowing twist...

You flip the rest of the entire deck over to reveal that **every single card** has **BLANK FACES!**

Now EVERYTHING can be examined 100%!
